

Greetings,

Do not exempt any commercial organization from the Do Not Call list. That includes the media, and their many outlets.

This is a national issue that has been boiling in the minds and hearts of at least 50 million households for years. No one who is on the Do Not Call list wants exceptions, otherwise why would they bother with it?

Get it?

It's regrettable that my comment here is even necessary given the obvious nature of the problem. If the ignorant morons in government would just go get jobs they are qualified to do, as opposed to the ignoble job of littering important documents with idiot exception clauses, I along with thousands of others would not have to waste their time here complaining.

Please fire all of the ignorant morons who added the offending clause and offer them jobs digging ditches or picking up litter on the roadside (which they probably dumped there in the first place).
